Next Steps Berlin Group NextGenPSD2

- Public Market Consultation and Finalisation Version 1.00
- Organise Implementation & Market Involvement
- Organise Testing Approach

Next Steps Berlin Group NextGenPSD2

- Public Market Consultation and Finalisation Version 1.00
 - Market Consultation started on 2 October 2017 (ref. www.berlin-group.org/market-consultations)
 - Intends to involve broader market interests
 - Market Consultation ends on 17 November 2017 (COB)
 - EC endorsement of EBA RTS and official publication now expected in November 2017
 - Aim: Publish NextGenPSD2 Framework standards before end of 2017
- Finalisation after endorsement and official publication EBA RTS
- Feel encouraged to submit your feedback!

Next Steps Berlin Group NextGenPSD2

■ Organise Implementation & Market Involvement

- After publication of V1.00 increased focus on Implementation Support
- A separate structure will facilitate implementations, integrate market supply- and demand-side feedback, and feed changes into the standards
 - Contribute to a good quality and change management of the standards
 - Provide guidance on implementation and interoperability issues
 - Identify business and technical market needs and optimisation potentials (of efforts, processes, costs, performance)
 - Offer support with e.g. best practices guidelines where needed
 - Contribute to future evolution of the standards
- Approach needed that balances stakeholder interests, with a governance operating model that aligns with defined operating requirements
- More clarity on exact governance operating model in Q1 2018

Next Steps Berlin Group NextGenPSD2

■ Organise Testing Approach

- Art. 27(6) Final draft EBA RTS: “ASPSPs shall make available a testing facility, including support, for connection and functional testing by TPPs”
- Harmonised interoperability standards provide a basis for harmonised testing requirements, common test policy, testcase catalogue and testtools
- Harmonised testing simplifies interoperability testing and renders cost and maintenance efficiencies

Thank you for your attention
